MPP-100	Mini-Peristaltic Pump for Gradient Gel Casting. Variable flow mini-pump, 120V, 60HZ; 9 or 12V battery. Variable flow Mini-Pump is a bidirectional, self-priming peristaltic pump for precise low-flow deliveries. The squeezing action of the rollers on the tubing progressively moves fluid through the tubing in advance of the rollers, resulting in a peristaltic pumping action. The flow is proportionate to the speed of the pump head and the inside diameter of the tubing, both of which can be varied. A variable speed flow control and 5 different sized tubing assemblies provide fine resolution with a wide range of flow rates	33,282.00
MPP-100-220	Mini-Peristaltic Pump for Gradient Gel Casting. Variable flow mini-pump, 220V, 50HZ .
