

P r o f i l e

Our modest beginning was done in the year 1975, with development of Tissue Culture Dish and Storage Vials, with active support from leading Scientist all over the country has resulted in developing strong 500 items, mostly Import Substitutes, for wide range of Biotechnology labs.

We are proud to present you specialize items in Current Product list. Plastic Disposable and reusable product for Medical Diagnostics, Microbiology, Bacteriology, Virology, Tissue Culture, you name it and we will have product for you.

Apart from Medical Research, we have wide range of product for Agriculture, Veterinary, Poultry and Pharmaceutical Research. We manufacture all the items from Prime Grade of Plastic Resins, like Polystyrene, Polypropylene, LDP HDP, Polycarbonate, Various Surface coating treatments, sterilization and packing in dust free atmosphere is done.

In existence of last 30 years, we are reaching to the prestigious customers, National Laboratories, Medical Institutes, Agricultural Universities, Pathological Labs and variety of other fields, to the nooks and corner of country. 'Laxbro' is introduced in many developed countries in North America, Europe, Middle East and South East Asia & Africa.

Well knit Distribution Network and stockiest are working for the service to customers, in India and World Market.

If you have any suggestions, please contact us; you can also visit our Website; Recently Laxbro product is well received in North and South American market as well in Europe and West Asia.

Laxbro Biomedical's commitment continues to focus on providing International quality product, reasonable price and quick service. Development of new product is our hobby and we will be glad to share our experience with you. It started with small Hand Operated machine, to-day we are equipped with State of Art machines from Germany, Japan and India, mostly CNC control, which gives quality product.

The preparation of culture media is a tedious, time consuming and critical work, affecting Quality of subsequent microbiology work. Use of TAURUS Ready to use sterile media plates is a simple, rapid, convenient and economical way towards Quality work in microbiology laboratory. The use of multiple media in a single plate like DI, TRI and TETRA facilitates presumptive identification in a convenient and economical way.
