# Dear Customers,

We would like to take this opportunity to thank you for your continued support for **BRAND** products. The first year of operations with our office in India has been indeed exciting and the decision is paying us rich dividends in understanding the needs of our customers in India. The developments across all industries and research establishments in India and globally are indeed heart-warming, opening up new opportunities for our R & D team back in Germany to look forward to innovative product developments and improvements. To highlight one such development is the introduction of the "Insert Systems" from **BRAND** going into the critical application of Animal Cell and Tissue Culture. With ever growing interactions between us we have introduced the Individual serial numbered Class 'A' Glass Volumetric Instruments during the year – a special demand from our Indian customers. The other highlight of the Price List 2013-14 is the rationalised pricing for our premium Life Science Consumables making the products extremely competitive as per your expectations. During the year we have set-up a **DEMO LAB** in Mumbai showcasing a wide range of our program and portfolio. We welcome you to an exciting first-hand experience with our high quality products displayed in the lab. Our constant endeavour would be to live up to your expectations and we look forward to an unprecedented support from your end encouraging us to become an integral part of your research and success. The India contact details are given on the back cover of this Price List for your ready reference.

Regards,

Paramjyoti Chakraborty

# General Terms for Sale

BRAND products are available from authorized distributors (see [www.brand.co.in](http://www.brand.co.in)). Orders are generally subject to the following terms to be confirmed separately by the distributor of choice.

The products listed in this Price List might under certain circumstances (e. g. specific duty free transactions) also be imported directly from "BRAND GMBH + CO KG – Germany". For General Terms & Conditions of Sales & Supplies from "BRAND GMBH + CO KG – Germany" please refer to the back cover of this Price List. Specific Terms & Conditions for a specific order would be separately indicated in the Performa Invoice/ Order Confirmation against the order.

## Price

The Prices set out in this Price List are the maximum Prices effective **October 1<sup>st</sup>, 2013** and it is open to parties to sell the products at Prices lower than the Prices set out. The Prices quoted here are consumer Prices applicable at the time of printing and are subject to alteration without notice. Goods shall be invoiced at Prices ruling on the date of despatch.

Please note that some of the products which fall under DG Category (Dangerous Goods) have to be shipped separately and sometimes by sea freight. Hence for all such items we will offer the prices as and when enquired through our distributors.

## Taxes and Duties

The Prices quoted here are inclusive of freight & customs duty. Central or Local Sales Tax, VAT, Octroi Charges, other duties, levies and impost are and will be charged extra unless specified otherwise as and when applicable. For exemption of Sales Tax and/or Octroi, the required declaration and/or Octroi exemption certificate should accompany the order.

## Delivery

- While every effort will be made to adhere to delivery dates, no responsibility is and will be accepted for non-delivery or for delayed delivery within the specified delivery dates.
- Items offered are subject to the goods being in Stock on the date of receipt of the order.

- Road Permit wherever applicable should accompany the order, failing which the order will not be executed till such time the same is received.
- For all products listed in the Price List the orders would be executed ONLY in case the minimum pack sizes are adhered to. For example the pack size of Catalogue number 90617 –Beaker, tall form, 50 ml is 10 beakers; hence orders with a minimum of one pack (10 beakers) or multiples of the pack size mentioned would only be entertained for immediate supplies.
- The BRAND export control management system strictly complies with all of the European Union's and the Federal Republic of Germany's rules and regulations regarding export restrictions. We do not tolerate or engage in any form of circumvention of these regulations and will not conduct business with anyone we believe may be trying to circumvent such regulations.
- Delivery for all the products falling under DG category (Dangerous Goods Category) will be specified along with the price only on receiving your enquiry for the same.

## Freight

All orders of invoice value of Rs.10,000/- and above are offered Free On Road destination station by Road Transport or Goods train. Goods for invoices valued at less than Rs.10,000/- will be sent on freight 'To Pay' basis.

## Insurance

- All goods are packed with utmost care and forwarded at customer's risk.
- No responsibility is taken for breakages or loss in transit. Such claims should be sent to the carriers without delay.
- Goods can be insured at the customer's request at 2% of the invoice value. Charges for insurance are and will be made on the invoice itself.

## Amendments or Cancellations

An order once placed shall not be cancelled.

# DAkkS Calibration Laboratory at BRAND

Accredited by the DAkkS as calibration laboratory in the German calibration service

Since the beginning of 2010, DAkkS (Deutsche Akkreditierungsstelle GmbH) has been the sole provider of accreditation services for regulatory matters in Germany. The legal foundations for DAkkS are Regulation (EC) No. 765/2008 and the German Federal Accreditation Law (AkkStelleG).

**DAkkS is the successor to DKD (Deutscher Kalibrierdienst) for calibration laboratories.**

As a joint governmental-industrial body, DAkkS represents a link between the national standards established by Germany's PTB (Physikalisch-Technische Bundesanstalt) and the measuring instruments used in industrial and research laboratories, and by testing institutions and authorities.

It thus effectively complements the existing verification system, the primary focus of which is consumer protection.

**DKD – well-known name, completely new function**

Following the establishment of DAkkS, DKD is no longer active in accreditation matters, and it was reconstituted in 2011 with a new mission under guidance from the PTB. Since that time, DKD has been responsible for further developing the fundamentals of metrological calibration, expanding technical support, and promoting standardization in metrology.

## DAkkS calibration laboratory

The former DKD calibration laboratory at BRAND for volumetric instruments was changed into an accredited calibration laboratory by the DAkkS according to DIN EN ISO/IEC 17025. The calibration laboratory at BRAND is therefore authorized to issue DAkkS calibration certificates for the following volumetric instruments. They are available in several languages.

BRAND calibrates the following volumetric instruments, no matter if they are new or already in use:

For ordering volumetric instruments with DAkkS calibration certificate, add "DAkkS" as a prefix to the catalog number. To obtain a DAkkS calibration certificate for volumetric instruments already in use (regardless of their make), send the instruments to BRAND marked with the note "DAkkS calibration".

- **Piston-operated pipettes**, from 0.1 µl to 10 ml
- **Multichannel piston-operated pipettes**, from 0.1 µl to 300 µl
- **Piston-operated burettes**, from 5 µl to 200 ml
- **Dispensers, dilutors**, from 5 µl to 200 ml
- **Glass volumetric instruments**, adjusted to contain (TC, In) from 1 µl to 10 l
- **Glass volumetric instruments**, adjusted to deliver (TD, Ex) from 100 µl to 100 ml
- **Plastic volumetric instruments**, adjusted to contain (TC, In) from 1 ml to 2000 ml
- **Plastic volumetric instruments**, adjusted to deliver (TD, Ex) from 1 ml to 100 ml
- **Glass density bottles**, from 1 cm<sup>3</sup> to 100 cm<sup>3</sup>

A major difference between works calibration services and DAkkS laboratories is the accurate determination of the respective uncertainty of measurement guaranteed by the accredited laboratory and supervised by the DAkkS.

## DAkkS calibration certificate

The DAkkS calibration certificate documents officially the traceability of measuring results to national and international standards as required by the standards DIN EN ISO 9001 and ISO/IEC 17025 for the monitoring of measuring instruments.

## When is a DAkkS calibration certificate necessary?

DAkkS calibration certificates are appropriate in uses in which calibrations of an accredited laboratory are requested, where high level calibrations are demanded and for calibration of reference standards and instruments for comparative measurements.

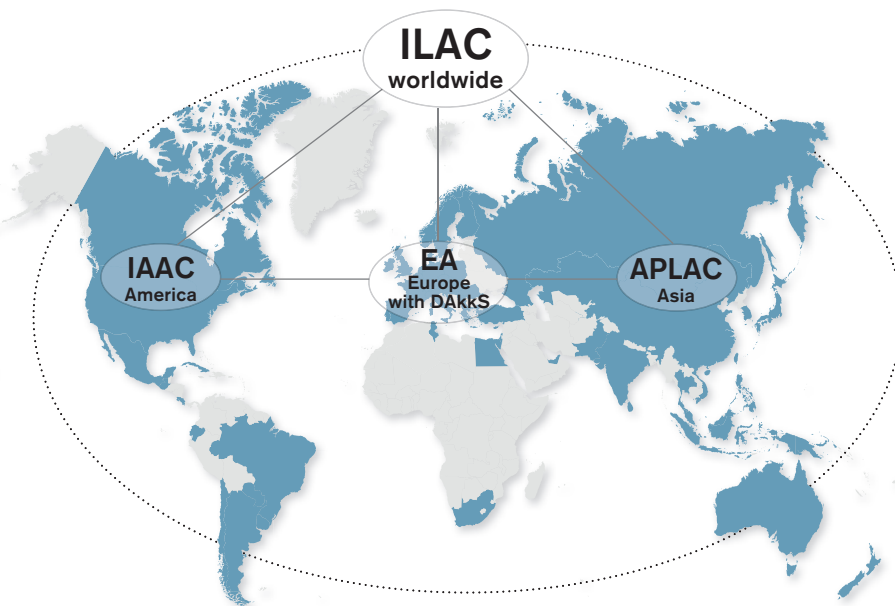

## DAkKS – A member in the International Accreditation Network

DAkKS is a member of the **International Laboratory Accreditation Cooperation (ILAC)**, the highest level international institution for laboratory calibration, and is a signatory to the MRA – Mutual Recognition Agreements.

The main objective of this international accreditation network is the mutual recognition of the professional services and results offered by accredited bodies, and to avoid technical barriers to trade and multiple accreditation.

The accreditation bodies that are signatories to the ILAC mutual recognition agreements (MRAs) recognize their mutual equivalence, and the equivalence of the calibration certificates issued by those same signatories. Likewise, signatories are obliged generally to promote and recommend recognition of the calibration certificates of other signatories (excluding factory calibration certificates).

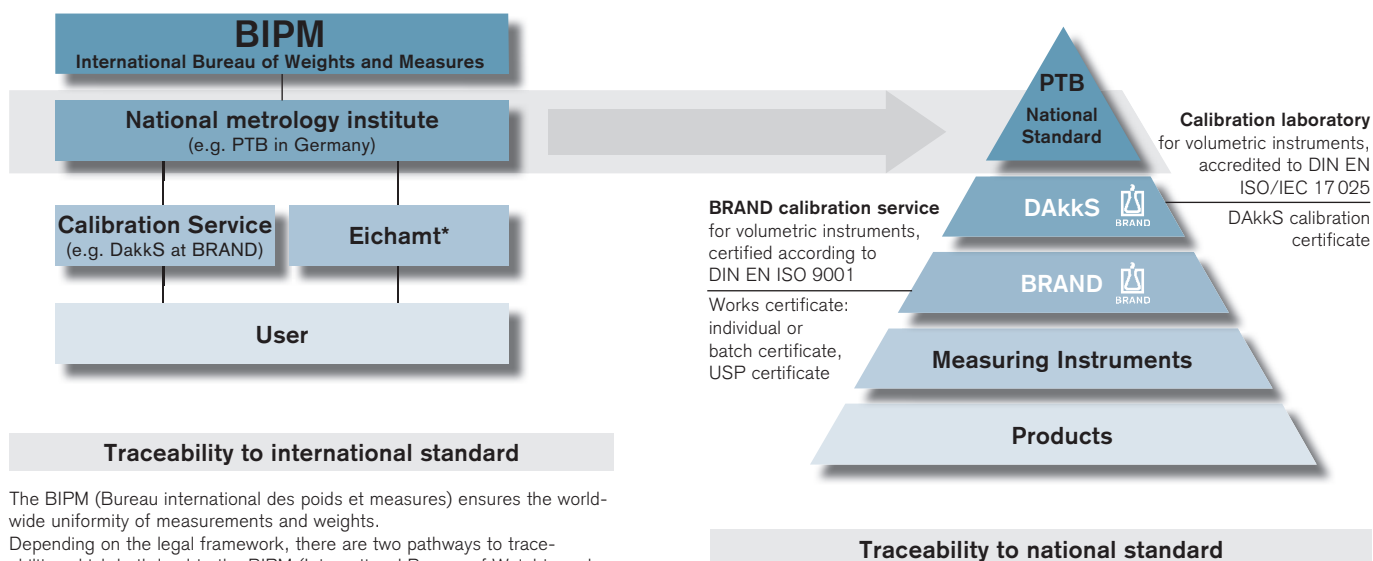

The complete information regarding the ILAC convention, as well as the list of all signatories can be read at [www.ilac.org](http://www.ilac.org).

### Signatory countries of the Mutual Recognition Agreement (MRA)

The DAkKS is a member of the EA (European Co-operation for Accreditation), which again is a member of the ILAC (International Laboratory Accreditation Cooperation). A multilateral agreement assures obligatory recognition of the DAkKS calibration certificate in a variety of countries.

## Measurement traceability to international and national standard

The BIPM (Bureau international des poids et mesures) ensures the world-wide uniformity of measurements and weights. Depending on the legal framework, there are two pathways to traceability, which both lead to the BIPM (International Bureau of Weights and Measures): Calibration, or – for all measuring instruments that fall under the Verification Act – verification.

\* German State Office of Weights and Measures

In Germany, the PTB (Physikalisch-Technische Bundesanstalt) is the national metrology institute. It observes the traceability to national standard.

# Life Science products

## Quality is our highest priority – for reliable analyses and reproducible results

It is hard to imagine carrying out analyses in the life sciences field these days without using high-quality disposables. For almost 25 years, BRAND has offered high-performance plastic products for various applications. We start by asking users around the world for input on product details, and then select raw materials and design injection-molding tools to ensure the highest product performance. Finally, the entire manufacturing process is strictly controlled, with quality assurance testing in accredited internal and external laboratories.

### Starting Materials

Sensitive applications, such as enzyme tests, PCR or DNA purification, require plastic disposable products of the highest quality. The proper selection of raw materials is a significant step in the manufacture of high-quality products. Over many years, polypropylene and polystyrene have earned their place as preferred materials for life science consumables. These materials often come into direct contact with expensive reagents and valuable samples.

For manufacturing pipette tips, BRAND uses specially selected PP types, free from the additives di-(2-hydroxyethyl) methyl-dodecyl-ammonium (DiHEMDA) and 9-octadecenamamide (oleamide). Both of these additives are frequently found in PP granules, and can interfere with biological tests, leading to spurious results\*.

The starting materials for life science products are carefully selected by BRAND so that substances that can dissolve out of the raw material (leachables), which could affect the results of biological tests, are reduced to the minimum necessary for processing. Mold release agents, such as stearates and erucic acid amide, are not used in the production process.

### Clean-room Production

BRAND disposable items for the life sciences are produced using the most advanced clean-room techniques in one of the world's largest cleanrooms for laboratory disposable items. Continuous cleanroom monitoring, together with precise control of environmental conditions, ensures a high level of temperature stability over the entire production area. This uniformity, together with quality testing of the final product by batch, guarantees the consistently high quality of life science products from BRAND.

Depending on the desired usage environment for the final product, cleanrooms according to ISO 14644-1 (Classes 5, 7 and 8) are available for manufacturing.

### Advantages of PS

#### ■ Good optical characteristics

Colorimetric tests like ELISA and microanalyses can be carried out with PS microplates.

#### ■ Easily modifiable surface

Physicochemical treatments can modify the surface so as to be suitable for applications in cell culture or immuno-analytcs.

### Advantages of PP

#### ■ High resistance to chemicals

Deep-well plates and microplates can be used with DMSO and other aggressive chemicals.

#### ■ Good temperature resistance

Containers remain stable even at high temperatures; these products are generally autoclavable at 121 °C (2 bar), acc. DIN EN 285.

#### ■ Minimal retention

PCR vessels, micro tubes and tips have no residual wetting and the material is biologically inert – no adhesion of biomolecules to the surfaces.

### Internal quality controls and independent laboratory tests

All products are subjected to a number of optical and functional tests before they are tested for molecular-biological contaminants. For example, PCR products are tested for evaporation losses and PCR plates are subjected to stringent vacuum tests to ensure that the systems satisfy your highest expectations. After the disposable items have successfully completed this internal process, the products are examined by an independent accredited laboratory. Sensitive detection methods are used to ensure that the products, depending on the intended use, contain no DNA, DNase, RNase, endotoxins or ATP.

# Certifications of BRAND GMBH + CO KG

## DIN EN ISO 9001

The DIN EN ISO certification earned by BRAND in Germany is your guarantee that the high performance standards designed into our products are consistently met in production and quality control. This certification ensures our customers and business partners that they are receiving products designed and manufactured to the highest international quality standards.

## DIN EN ISO 14001

We believe that sustainable environmental protection and business needs are not incompatible. BRAND's business procedures are oriented towards the principles of a sustainable future and forward-looking development of products, and we believe that they should guarantee future generations the possibility of free development and growth. We want to make products that are safe to manufacture, safe to use, and that can also be disposed of safely. Active environmental protection is thus a significant concern of ours, anchored in our philosophy and in our business practices.

BRAND has been certified according to DIN EN ISO 14001 since 1998.

## DAKKS Calibration Laboratory acc. to DIN EN ISO/IEC 17 025

This accreditation documents, for all DAKKS calibrated instruments, traceability to national and international standards. In 1998, a BRAND calibration lab was accredited by the DKD as a calibration laboratory for volumetric equipment according to DIN EN ISO/IEC 17 025. DAKKS (Deutsche Akkreditierungsstelle GmbH) is the successor to DKD (Deutscher Kalibrierdienst) for calibration laboratories. As an accredited DAKKS laboratory we are licensed to issue calibration documents for Liquid Handling instruments (e.g., piston-operated pipettes, burettes, dispensers, dilutors), glass and plastic volumetric instruments and for glass density bottles.

**More than just precise – slim, light and dependable!**  
The new HandyStep® S repetitive pipette fits the hand like a glove, offers highly dependable performance and is simple to operate.

- **Truly stress-free!** Well-balanced weight distribution, ergonomic control element layout
- **Always dependable!** Robust construction, inspired design, and innovative polymers
- **Always ready to use!** No battery-dependent display, no battery change! Integrated volume table
- **Highly versatile!** 10 pip-tip sizes (incl. the new 1 and 10 ml tips), 99 different volumes. Accepts third-party dispenser tips!
- **Contact-free!** Eject tips with the press of a button – never any tip contact!

**PLT unit – Pipette Leak Testing Unit!**  
Improve process reliability with functional validation of air-displacement pipettes!  
The most frequent cause of inaccuracy in piston-operated pipettes is leakage. This arises from damage either to the seals, pistons, or tip cones. Often not detectable by the naked eye, leaks lead to significant volume errors. The BRAND pipette leak tester (PLT unit) for air displacement pipettes finds even the smallest leaks within seconds.

# BRAND GMBH + CO KG General Terms and Conditions

## 1. General

- 1.1. These Terms and Conditions (T&C) are intended for use in commercial transactions between businesses.
- 1.2. These General Terms and Conditions shall apply for all, including future, contracts with the customer. Other terms and conditions shall not become part of the contract, even if we do not expressly object to them. Subsidiary agreements made before or at the time of conclusion of contract may only be invoked if they are immediately confirmed in writing. The waiver of the requirement for written form shall only be possible in writing. The language of the contract shall be German or English. In the event of a discrepancy between the German language version of these General Terms and Conditions and a version in any language, the German language version shall prevail.
- 1.3. Our offers are subject to change and non-binding. We reserve the right to make technical improvements to our products.
- 1.4. We may store and process data in our IT system necessary for the purpose of processing the contract.
- 1.5. A set-off by the customer shall not be permitted unless the counterclaims are undisputed or legally established, or pecuniary counterclaims arising from the right to refuse payment pursuant to Section 320 Bürgerliches Gesetzbuch (German Civil Code).
- 1.6. Orders with a goods value of below €100 shall be subject to a minimum order surcharge of € 20. Delivery shall be undertaken generally in packaging units (PU) according to the currently valid price list. For deliveries within five (5) working days or for order values up to € 500, we reserve the right to waive an order confirmation.
- 1.7. The place of jurisdiction shall be the court responsible for our head office in Wertheim/Mosbach, Germany. We shall also be entitled to appeal to the court responsible for the head office of our customer. We shall, furthermore, as plaintiffs have the right to invoke the Arbitration Court at the Chamber of Commerce and Industry in Frankfurt am Main, Germany. The Arbitration Court shall, in this case, make the final judgment in accordance with the Rules of Arbitration of the Chamber of Commerce and Industry in Frankfurt am Main without recourse to the ordinary courts of law. The instigation of legal dunning proceedings by us shall not signify the exertion of our right of choice; it shall be admissible in all cases.
- 1.8. German law shall apply exclusively under the exclusion of the conflict of laws principles of Private International Law and the UN Convention on Contracts for International Sale of Goods (CISG).

## 2. Delivery

- 2.1. The place of performance shall be our factory in Wertheim, Germany. The risk shall transfer to the customer when the delivery leaves the ramp at our factory. This shall also apply to partial deliveries or where we have performed additional services, such as shipping; costs for transport, packaging or insurance; exportation and installation. This shall also apply for deliveries to a consignment warehouse of the customer.
- 2.2. Insofar as we have agreed to orders on call, the customer must take delivery of the total amount within six (6) months, at the latest at the date confirmed by us.
- 2.3. In the case of a delay in the customer's acceptance of a delivery, we may, without prejudicing our claim for performance, have the goods put into storage at the cost of the customer or, after providing a warning and setting a deadline for the customer, otherwise dispose of them.

## 3. Delivery period, Delay

- 3.1. Delivery times shall be ex works. Delivery periods shall begin on receipt of our order confirmation by the customer; however only after settlement of any technical issues pending from the conclusion of the contract; and after receipt of any documents to be provided to us by the customer, such as drawings, permits or approvals; and definitely not before receipt of agreed advance payments. The delivery period shall be considered to have been met if readiness for dispatch has been notified before the expiry of this period. Delivery shall be subject to us receiving our own supplies punctually and in good order.
- 3.2. Force Majeure and circumstances beyond our control, such as strikes, lock-outs, operational disruption, shortages of raw materials and equipment, delayed delivery or non-delivery by our suppliers, shall extend the delivery periods accordingly and shall release us from our delivery obligations if they, as a result, render delivery impossible. We shall also not be liable for the circumstances described above if they arise during an already existing delay. The same shall apply for any additional or amended services requested by the customer.
- 3.3. We shall be considered to be in default of delivery only if the customer has issued us with a reminder, has set a reasonable extension period which has elapsed.
- 3.4. In the case of delay damages, our liability for compensation shall be limited to 10% of the value of the delayed delivery/service. The limitation shall not apply in cases of wilful intent, gross negligence and/or injury to life, limb or health. The customer shall be obliged to immediately inform us in writing of any likely consequences of delay.

## 4. Prices, Terms of Payment

- 4.1. Prices shall be ex works and exclusive of statutory VAT, if applicable. Costs of packaging, transportation, freight and insurance shall be borne by the customer. Prices shall also be exclusive of the cost of returning and recycling/disposing of old equipment.
- 4.2. Invoices shall be payable to our account in EUROs (€) without deductions and free of charges and expenses. Payment shall be made immediately or by the date stated. The determinant factor shall be the receipt of payment. Cheques and bills of exchange shall only be accepted on account of performance and at the cost of the customer.
- 4.3. In the case of customers, with whom we are working for the first time or with whom we do not work regularly, after delay in payment or in the case of reasonable doubt as to the creditworthiness of the customer, we shall reserve the right to make individual deliveries dependent on their pre-payment or a security deposit to the value of the invoice amount.
- 4.4. Should the period between conclusion of contract and agreed delivery exceed four (4) months, so may we, at our discretion, demand a reasonable additional charge equivalent to the increase in our costs up until delivery. For deliveries on call, our current price shall apply.
- 4.5. In the case of an agreed return of goods that are free of defects, the customer shall be charged a checking and processing fee of 15% of the invoice amount (minimum €10).
- 4.6. Should the customer be in arrears with payment, our debt claims against him shall be due immediately, and we shall not be obliged to make any further deliveries based on current delivery contracts.
- 4.7. If payment is delayed, we shall charge - notwithstanding further damage compensation claims - interest on arrears at the statutory rate.
- 4.8. We may offset amounts payable to the customer (e.g. from credit notes) against our claims against the customer.

## 5. Retention of Title and Assignment of Future Claims

- 5.1. The goods delivered shall remain our property until the complete and unlimited payment. Should we still have further claims against the customer, we shall then retain our property rights until payment of these has been effected.
- 5.2. The customer may neither use goods subject to retention of title nor combine them with other objects to which a third party may have rights. Should, however, goods subject to retention of title become, through their combination with other objects, part of a new (complete) item, we shall be a proportional co-owner of this new item directly, even if this latter component is regarded as the main component. Our proportion of co-ownership shall be determined by the ratio of the invoice value of the goods to the value of the new item at the time of combination.
- 5.3. The customer may resell goods subject to retention of title in the course of his normal business as long as he has not assigned, pledged or otherwise encumbered his claims from the resale.
- 5.4. The customer shall assign to us in advance any claims against his customers from the resale of the goods subject to retention of title (see Clause 5.3) and/or newly formed items (see Clause 5.2) to the value of our invoice for the goods subject to retention of title. As long as the customer is not in default of payment for the goods subject to retention of title, he may collect the assigned claims in the ordinary course of business. He may, however, only use the proportional proceeds for the payment to us for the goods subject to retention of title.
- 5.5. At the customer's request, we shall release collateral at our discretion if and to the extent that the nominal value of the collateral exceeds 120% of the nominal value of our outstanding debt claims against the customer.

- 5.6. The customer shall be required to inform us immediately of any attachments, seizures or any other third-party dispositions relating to the goods that are reserved or co-owned by us.
- 5.7. In the event of failure to pay bills of exchange or cheques, or failure or recall of a payment made by debit order/direct debit mandate, suspension of payments or insolvency of the customer or of the end buyer, the rights of the customer under Clause 5.3. shall no longer be valid. The customer must then immediately inform the buyer of our extended retention of title; he may use the assignment of relevant proportional proceeds only to pay for the delivered goods.
- 5.8. Where payment is delayed and in the cases covered in Clause 5.7, we shall be entitled to withdraw from the contract and/or, without withdrawing from the contract, demand the return of any goods subject to retention of title still in possession of the customer and to collect the assigned receivables ourselves. In order to ascertain our rights, we shall be entitled to have all of our customer's documents/books concerning our reserved rights examined by a person who is subject to the professional duty of confidentiality.

## 6. Warranty, Limitation of Liability

- 6.1. We warrant that our delivered goods (including any agreed installation) are free of defects at time of risk transfer. The required quality, durability and use of our delivered goods are based solely on the agreed written specification, product description and/or operating manuals. Any information beyond this, in particular in preliminary discussions, advertising and/or referencing industrial standards shall only become part of the contract if they are expressly referenced in writing.
- 6.2. Should the customer requires the delivered goods for purposes other than those agreed, he must take responsibility himself for examining their special suitability for this - also in terms of product safety - and ensure their compliance with all relevant technical, legal or regulatory provisions before the intended use. We shall not be liable for any usability that was not expressly confirmed by us in writing. In the case of material or design requirements of the customer, we shall accept no liability for the suitability or permissibility of the desired materials or designs, and shall, in this respect, have no particular testing obligation. Compliance with safety-related and occupational health regulations depends on the location and operating conditions of which we have no prior knowledge. Action for ensuring compliance shall therefore be the responsibility of the customer or his buyer.
- 6.3. We shall not be liable for the consequences of improper handling, use, maintenance and operation of the delivered goods; the consequences of normal wear and tear, in particular of wearing parts, such as pistons, seals, valves; the breakage of glass, plastic or ceramic parts; for the consequences of chemical, electrochemical or electrical influences; or non-observance of the operating instructions.
- 6.4. If a notice of defect is justified, we shall initially only be required to provide supplementary performance. Supplementary performance shall be, at our discretion, either rectification of the defect or delivery of goods free of defects. Further warranty claims shall only apply in the event of rejection, impossibility or failure of the supplementary performance. The customer shall bear additional expenses, which arise from the fact that the goods were taken after delivery to a location other than the agreed place of performance.
- 6.5. The customer must, immediately upon receipt of the goods, inspect them carefully, also in terms of product safety, and notify obvious defects immediately in writing; any hidden defects must be immediately notified upon discovery. The customer must notify the carrier immediately of any transport damage. Failure to observe the testing and notification obligation shall void any customer claims for defects.
- 6.6. Our liability for slight negligence shall be limited to claims for injury to life, limb or health, to claims under the Produkthaftungsgesetz (German Product Liability Act) or to claims of culpable breach of fundamental contractual obligations through which the purpose of the contract is endangered. Otherwise, our liability for slightly negligent breach of fundamental contractual obligations is limited to the typically occurring damages which we could have foreseen when the contract was concluded.
- 6.7. Should the customer use the delivered goods in conjunction with environmentally harmful, toxic, radioactive or otherwise hazardous materials, he shall be obliged to clean them before returning them to us. If applicable, we may charge any necessary costs for decontamination/cleaning and disposal to the customer's account.

## 7. Limitation Period

The warranty period shall be one year and starts from the date of delivery of the goods to the customer. The same shall apply for claims for damages, irrespective of their legal basis. The limitation periods of Section 438 Para. 1 Nos. 1 and 2, Section 479 Para. 1 and Section 634a Para. 1 No. 2 of the BGB (German Civil Code) shall remain unaffected. The restriction of the limitation period shall not apply to claims based on fraudulent concealment of a defect, for claims under the Produkthaftungsgesetz (German Product Liability Act) or for damages resulting from injury to life, limb or health and other damages based on intent or gross negligence. The limitation period in respect of replaced or repaired goods shall not commence anew.

## 8. Software use

- 8.1. If software is included in the scope of a delivery, the customer shall be granted a non-exclusive right to use the software and its associated documentation. It is provided for use on the designated delivery item. The use of the software on more than one system shall be prohibited.
- 8.2. The customer shall only be entitled to copy, transfer or translate the software or to convert it from object code to source code to the extent permitted by law (Sections 69a et seq. Urheberrechtsgesetz – German Copyright Act). The customer undertakes to refrain from removing manufacturer information, in particular copyright notices, or from changing these without our prior express consent or the prior express consent of the software supplier.
- 8.3. All other rights to the software and the documentation including copies thereof shall remain with us and/or the software supplier. The issue of sub-licences is not permitted.

## 9. Installation

- 9.1. Installation costs may be invoiced on a monthly basis. Fixed installation prices shall only cover the work that has been agreed upon. In other cases our current price list for installation and service costs shall apply.
- 9.2. The customer shall be responsible for providing the following at his own expense: lighting, motive power, if necessary, compressed air, water, electrical power for welding and heating, including the necessary connections; electrical installations to connect the products supplied by us; the devices required (such as lifting equipment); a lockable room that can be used for storing materials, tools and clothing during the installation.

## 10. Spare Parts, Maintenance/Repair and Calibration

- 10.1. For spare parts and maintenance, repair and calibration services, the current repair and exchange price list shall apply.
- 10.2. Insofar as there is an obligation on our part to maintain/supply spare parts, then this obligation shall be limited to a period of five (5) years from the date of delivery. If spare parts are not manufactured by us, or are no longer available on the market, for example electronic components, or if the raw material for their production is no longer available, our obligation to deliver spare parts shall lapse.
- 10.3. For calibration and maintenance, expendable items from BRAND production are normally used.
- 10.4. Maintenance and calibration services can only be provided if the customer has declared the devices sent to be safe to work on from a health hazard perspective.
- 10.5. For repair/service values of up to € 50, we reserve the right not to provide a separate cost estimate.

## 11. Legal Reservation, Industrial Property Rights, Confidentiality

- 11.1. We reserve ownership and all industrial property rights and copyrights to all moulds, tools or other devices, samples, pictures, and business and technical documents produced or provided by us. This also applies where the customer has wholly or in part taken on the costs hereof. The customer may use these only in the manner agreed with us. Without our written consent, he may not himself manufacture contractual objects delivered or have the same manufactured by third parties.
- 11.2. Insofar as we deliver goods according to the designs or other requirements specified by the customer (models, patterns etc.), the customer shall be liable to us by default for ensuring that, through the manufacture and delivery of these goods, the industrial property rights or other rights of third parties are not infringed. If the customer is at fault he shall reimburse us all damage resulting from any such infringement of rights.
- 11.3. Any information acquired from this business relationship and not deemed to be public knowledge must not be disclosed by the customer to third parties.
